

Air Inlets

Air Inlet: REGEL-AIR

- ✓ A rebate vent, which is placed in the inner part of the frame, makes it almost invisible when the window is closed
- ✓ This allows air to circulate at the point of installation
- ✓ Air flow (for two diffusers) at 10 Pa: 5 m³/h
- ✓ Acoustic attenuation: Dn, e, w = 34 dB

In the offer you can find pressure air inlets for use in PVC windows, available also with manual adjustment.
