

ALFA 414

- ✓ piston linear piston speed: 16 mm/s
- ✓ maximum leaf opening angle: 110°
- ✓ maximum leaf width (with electromagnetic lock): 4 m
- ✓ frequency of use: 18 cycles/hour

ALFA 414 is a universal drive for swing gates. It is suitable for any type of post. Despite its relatively low power consumption and favourable price, it is the most powerful drive in its class on the market.

The self-braking ALFA 414 drive ensures safe usage without needing electromagnetic locks also on very wide gates.
