- ✓ Height: up to 270 cm
- ✓ Magnetic snap fastening
- ✓ Specialised nets available
- ✓ Profiles painted in all RAL colours

The Click-Roll door roller shutter is a convenient and aesthetically pleasing solution that can be combined with any type of classic and sliding doors, including HST systems with a slanted threshold.

The roller shutter is mounted on a dedicated track on which it is moved effortlessly. The reliability of the solution is guaranteed by the Click-Roll system.

The roller shutter closes firmly using a magnetic profile. In the folded state of the net, it does not significantly reduce the doorway's width.

The installation is permanent. Users can remove the net for the winter period and reattach it during the season on their own.
