- ✓ Standard spindle length: 35 mm
- ✓ Available colours: white, brown, cream, black

FKS mod. 1006

FKS window handles are characterised by high quality and durability thanks to proven technical solutions. The handles work with escutcheons made of wear-resistant synthetic material. They have a wide range of applications for various windows with diverse functions requiring different types of handle positioning.

*the handle is available in key and push-button variants for selected spindle lengths and colours.

** can be used as a centre handle (short spindle version).
