

QuadBox

- ✓ box shape: square
- ✓ curtain type: aluminum filled with polyurethane foam or PVC
- ✓ aluminum guides
- ✓ resistance to weather conditions
- ✓ inspection flap at the bottom (PVC)

Well-thought-out design, easy to install and service. As the only system of this type on the market, it has the option of choosing a PVC inspection flap, which, apart from the lower cost compared to the aluminum one, allows for a better color matching of the roller shutter in relation to the windows, thanks to the possibility of covering it with any AP, SAI or GEA color.
